Online Multilanguage Support

To access troubleshooting support for safety light curtain errors in your local language use your tablet or smartphone to scan a QR code sticker that can be applied to the machine.

Also accessible by computer, operators can check the error details in 8 languages and download manuals from a dedicated website.

The interactive diagnostics ask about error indicator color, indicator flashing frequency and DIP switch settings to thoroughly analyze the cause of an error.

Languages include English, Spanish, French, Chinese, Korean, Japanese, German, and Italian.

Built-in Muting and Blanking

Built-in muting to pass through materials into the hazard zone requires no external muting controller. The blanking function disables specific beams of the safety light curtain. A warning zone can be set to alert people before they enter a danger zone using single or series-connected units when horizontally mounted.

Reduced Wiring Work

"Smart click" 1/8 turn quick-connect M12 cables allow fast installation and proper torque to ensure IP67 connection.

Receiver	EDM Enabled (factory default setting) *1
	Auto Reset (factory default setting) *1
	PNP (factory default setting) *1
Emitter	External Test: 24 V Active (End Cap: Black) (factory default setting)

Wiring Example

*1.The functions are configurable with Configuration Tool. Refer to *Safety Light Curtain Configuration Tool for Model F3SG (SD Manager 2) User's Manual* for more information on setting the functions by the Configuration Tool.

*2.Connect the line to 24 V via a test switch (N.O. contact) if External Test is used.

*3.Connect a lockout reset switch (N.C. contact) to this line in series with the KM1 and KM2 if Lockout Reset is used.

*4.Used as MUTE A and B lines when Muting is used.

*5.The F39-JD□□RA-L Single-Ended Cable for Emitter (Oil-Resistant Extension Cable) does not have the red, white and yellow wires.

*6.For the F39-JD□□A-□ Single-Ended Cable, connect the shield line to 0 V.

Note: Functional earth connection is unnecessary when you use the F3SG-RR in a general industrial environment where noise control or stable power supply is considered. However, when you use the F3SG-RR in an environment where there may be excessive noise from surroundings or stable power supply may be interfered, it is recommended the F3SG-RR be connected to functional earth.

The wiring examples in later examples do not indicate functional earth. To use functional earth, wire an earth cable according to the example above. Refer to *Safety Light Curtain F3SG-RR Series User's Manual* for more information.

Note: For the functional earth connection, refer to page 66.

Replacing the F3SJ-B Safety Light Curtain with F3SG-RR

The following is the example of External Device Monitoring enabled, Manual Reset Mode, PNP outputs and External Test in 24 V Active (used). When replacing the F3SJ-B with F3SG-RR, change the wiring as shown below if using the Interlock/Lockout Reset function with the RESET line (yellow) of the F3SJ-B emitter.

[F3SJ-B Wiring Example]

[Wiring Example to Replace with F3SG-RR]

- Note:** 1. Connect the RESET line (yellow) used for the F3SJ-B emitter to +24 VDC line directly. This connection is not needed when using the Auto Rest Mode.
 2. For the functional earth connection, refer to page 66.

F3SG-RR with Reduced Wiring Connector and PNP Outputs

The following is the example of Muting not used, External Device Monitoring enabled, Auto Reset Mode, PNP outputs and External Test in 24 V Active (not used).

Connections (Basic Wiring Diagram)

Short Mode

*1. Refer to page 99 for more information.

*2. The safety controller and the F3SG-R must share the power supply or be connected to the common terminal of the power supply.

Note: Functional earth connection is unnecessary when you use the F3SG-R in a general industrial environment where noise control or stable power supply is considered. However, when you use the F3SG-R in an environment where there may be excessive noise from surroundings or stable power supply may be interfered, it is recommended the F3SG-R be connected to functional earth. The wiring examples in later examples do not indicate functional earth. To use functional earth, wire an earth cable according to the example above. Refer to *Safety Light Curtain F3SG-R Series User's Manual* for more information.

Long Mode

*1. Refer to page 99 for more information.

*2. The safety controller and the F3SG-R must share the power supply or be connected to the common terminal of the power supply.

Note: For the functional earth connection, refer to the Short Mode example.

Standalone F3SG-RE with Y-Joint Plug/Socket Connector

Note: 1. When using the reduced wiring connector system F39-GCNY1, the Operating Range Selection is fixed to Long Mode.
2. For the functional earth connection, refer to the Short Mode example.

When using the F3W-MA Bracket, it is necessary to add an extra Standard Adjustable Bracket (F39-LGA) to the F3SG-RA. * Please also purchase Standard Adjustable Bracket (F39-LGA).	Two brackets per set	F39-LGMAL
				F39-LGMAT

Note: When mounting an F3W-MA0300P in the L-shaped configuration, the shock resistance becomes as follows.

Shock resistance: 50 m/s², 1000 shocks for all 3 axes

For mounting an F3W-MA0300P under a shock environment exceeding this, the F3W-MA Bracket cannot be used. Use a Standard Adjustable Bracket (F39-LGA).

* When using F39-LGMA□, there are some restrictions on the brackets to mount the F3SG-RA. This bracket is not usable together with F39-LGF. When using together with the F39-LGA, the protective height of the F3SG-RA must be 270 mm or longer. When using together with F39-LGTB, the protective height of the F3SG-RA must be 400 mm or longer. An extra F39-LGA is required for reinforcement, depending on the mounting position of the F39-LGMA□. Refer to "Dimensions" on page 125 for details.

Mounted with F3W-MA Bracket (F39-LGMA□) and Standard Adjustable Bracket (F39-LGA) on F3SG-RA

Note: When mounting an F3W-MA0300P in the L-shaped configuration, the shock resistance becomes as follows.

Shock resistance: 50 m/s², 1000 shocks for all 3 axes

For mounting an F3W-MA0300P under a shock environment exceeding this, the F3W-MA Bracket cannot be used. Use a Standard Adjustable Bracket (F39-LGA).

* The distance between the centers of the F3W-MA and the Standard Adjustable Bracket (F39-LGA) must be 100 mm or less. When the distance is longer than 100 mm, add an extra Standard Adjustable Bracket for reinforcement.
