

Mobile Robot Wellness Visit

Complete Preventative Maintenance Service for your Robotic System

Your trusted partner in automation

INTEGRATED | INTELLIGENT | INTERACTIVE

The Mobile Robot Wellness Visit

During the day long visit, an Omron certified Field Service Engineer will perform all recommended factory maintenance activities and complete a comprehensive inspection of your robot.

Complete Assessment

At the completion of the inspection, you will be given a report that documents the details of the service along with a list of any additional repairs or services needed to maintain your robot.

Values and Benefit

- Maintain the value of initial Robot investment
- Decrease likelihood of expensive repairs with annual visits
- Have confidence that your system is well maintained
- Reduce the risk of unplanned production downtime

Protect your
Robotic
Investment!

With our more than 80 years of industry experience, Omron understands automation, applications and safety.
