Conforming to
EMC Directive

Air-gun type ionizer that can remove dust in a single burst using pulsed air

Direct ionized air emission

Direct emission of ionized air removes electrification on charged object swiftly.

Pulse ionized air

Instant pulse air emission with high air pressure removes dust all at once.

White LED illumination

The white LED illuminates on the target object.

External input incorporated

External input allows the tool to be used in conjunction with other equipment such as a foot switch.

Oil-free compatible

All components on the air path (air outlet, solenoid valve, joint, etc.) are suitable for use in oil-free environments.

PRECAUTIONS FOR PROPER USE

- This product includes precision components, so do not drop it or hit it against other objects. If this is not observed, accidents or problems with operation may occur.
- Never use this product in a device for personnel protection.
- Do not use this product in places where there may be danger of flammable or combustible items being present.
- High voltages are applied to the discharge needle, so never touch the discharge needle while the power for the product is turned on, otherwise electric shocks may result.
- Since the tip of the discharge needle is sharp, take sufficient care in handling the discharge needle, or injuries may result.
- If this product is used in an airtight room, ozone emitted from this product may be detrimental. Therefore, in order for this product to be used in an airtight room, be sure to keep the room ventilated.
- Do not direct ionized air toward the face. Ozone may cause irritation to places such as the nose and throat.
- Do not look directly into the white LED spotlight. It may cause injury to the eyes.
