

### **Programmable Display**

# **Excellent Visibility and Environmental Resistance**

High visibility display even in bright environments, it's also compact.

Introducing a new product line in the Tough Series with excellent environmental resistance

### New Models Added to the GT Tough Series

## **GT03-E Compact Models Debut!**

## Charging possible

the car and then press the "START" button.

5.7 inch

• The LCD picture on this page is simulated images.

The wide operating temperature range allows for use in various environments.

(-20 to +55 °C -4 to +131 °F when horizontally installed, vertically installed in a portrait orientation and when using battery)

Resistant to UV Rays!

The two-layer front protection sheet deduces UV rays in two-stage.

**IP67** 

High waterproof performance allows for use in environments exposed to splashing water.

The front panel has a protective structure rated IP67.

Color type (GT03T-E): 3.1 W or less Monochrome type (GT03M-E): 1.9 W or less

High visibility display even in bright environments!

High in brightness and contrast and anti-glare coating provides exceptional viewing characteristics. Monochrome type uses a TFT LCD that's bright and uses deep black for great visibility.

definition

Same resolution [320 (W) × 240 (H) dots] as the 5.7 inch model (GT32-E)

Screen data of GT32-E can be used on the smaller display.

The industry's smallest class\* body among 3.5 inch screen

\*Based on research conducted by our company as of June. 2013

See page 4 for details.

### **Applications** Charging station for Electric Vehicle (EV) Car washing machine Coin-operated parking Food filling machine

#### **Common Features for Tough Series**

#### Superior visibility even in sunlight

#### Color type

Monochrome type

Tough series GT32T-E

**Conventional model GT32T** 

Tough series GT32M-E

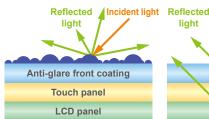

Conventional model GT32M

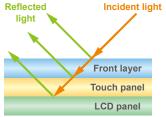

- High contrast TFT LCD: Achieved higher contrast and visibility.
- · High brightness backlight: Achieved greater brightness and visibility than the conventional model.

The monochrome type, in particular, is greater brightness than the conventional model and is way easier to view in bright environments thanks to the "deep black".

#### Anti-glare, High visibility display

· A front protection layer has an anti-glare coating to prevent unwanted reflections (Fingerprints are made less noticeable even in outdoor use) Comparison of reflection

Anti-glare front coating No anti-glare front coating

Tough series GT32T-E

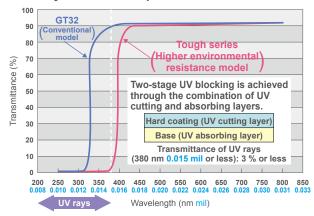

Conventional model GT32T

#### No risk of product deterioration due to **UV** exposure

- · The front sheet is made of a material that does not transmit UV rays.
- A combination of a UV cutting layer and a UV absorbing layer performs two-stage UV blocking.

The LCD and touch panel can be protected from deterioration.

#### ■ UV ray transmittance performance

#### Excellent water resistance

- The front panel has a protective structure rated IP67. Safe to use outdoors or in a location exposed to splashing water.
- Added protection has been applied to the rear of the unit for a more rugged overall construction.

#### Wide operating temperature range

- Usable in a range of -20 to +60 °C -4 to +140 °F (-20 to +55 °C -4 to +131 °F when horizontally installed, vertically installed in a portrait orientation and when using battery)
- The TFT LCD can quickly switch screens even at a low temperature.
- The life of the LED backlight does not decrease even at a low power consumption.
- It is not necessary to prepare a heater for use at a low temperature.

#### Reduced power consumption

- Compact color type (GT03T-E): 3.1 W or less
- Compact monochrome type (GT03M-E): 1.9 W or less
- Color type (GT32T-E): 7.2 W or less
- Monochrome type (GT32M-E): 4.8 W or less

GT03T-E

#### 3.5 inch, 4,096 colors TFT color LCD equipped with long life LED backlight

#### Built-in SD / SDHC memory card slot \*2

Easy to copy, back up, and restore screen data.

#### GT03M-E

#### 3.5 inch, 16-gray scale TFT monochrome LCD equipped with long life LED backlight

Through use of a TFT LCD with contrast ratio of 1,000: 1, the "deep black" on a bright display means incredible visibility even in bright environments.

Common features

#### Superior visibility even in sunlight

The brightness and contrast ratio have been improved.

#### Wide range of operating temperature that covers outdoor use

The improved environmental resistance allows for use in a wider operating temperature range of -20 to +60 °C -4 to +140 °F.

#### UV resistant, anti-glare front panel

A front protection layer reduces the intensity of UV rays and has an anti-glare coating.

#### Impressive water resistance makes usage possible in areas prone to water contact.

The front panel is IP67 rated with added protection applied to the rear of the unit for a more rugged overall construction.

#### **Integrated USB Interface**

You can connect your PC and GT03-E using your USB cable to transfer screen data. When used with our **FP** series PLC, this display supports the pass through function, which allows simultaneous debugging of the PLC and the display

\*2: Class 10 compatible with a card of up to 32 GB

# SD Solutions only Panasonic can provide

### Links and expansion via SD

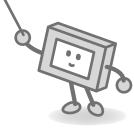

As small-size touch panels have significantly improved their image quality,

easy to read displays with sharp characters are no longer special features these days.

Instead, programmable displays will evolve with maximum "user-friendliness"

in various applications with PCs or other devices.

As shown below, our touch panels exchange and store data using SD memory card, data for many applications.

#### Links via SD

- ▶▶ SD recipe function (Data table management)
- ▶▶ Transfer of PLC program data

#### **Expansion via SD**

- ▶▶ Saving alarm history data on an SD
- **▶▶** Logging function
- ▶▶ Display of graphs of stored data

It is possible to modify PLC ladder programs as well as the **GT** screen programs by using an SD / SDHC memory card. SD / SDHC memory card enables everyone to easily modify programs.

#### SD card data transfer function

Log and other data saved on a SD memory card inserted into the **GT**'s onboard SD memory card slot can now be sent to a PC using a USB connection.

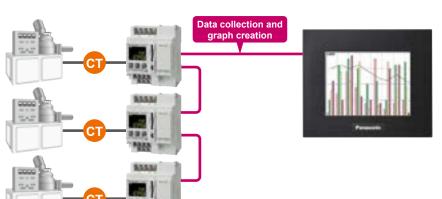

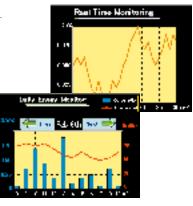

Installation on the PC of **GT\_SD\_**Reader software is required. This software is installed simultaneously with **Terminal GTWIN** (Ver. 2.E1 and higher). The **GT** unit firmware must be a version that supports this function. If you are using a version that does not support this function, please upgrade by downloading it from our website.

#### SD logging function to produce data "Visualization"

Capable of automatically collecting electrical power readings of Eco-POWER METERS and displaying them in a real time graph, allowing users to take quick actions for solutions.

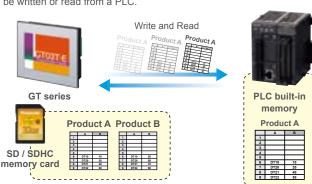

- The GT unit can collect data, such as electrical power on an SD / SDHC memory card, and display the log data in a real time graph. You can make data "Visualization" without using a PC as a display or Data logger for collecting data.
- One bar graph has a maximum of eight bars and can be combined with line graphs.
- The following three conditions can be selected to trigger an operation to save log data.
   (1) Specified time (2) Specified cycle (1 sec. to 24 hrs.) (3) Specified condition
- Large volumes of data can be saved on an SD / SDHC memory card, which can be carried with you.

#### SD recipe function

For high-mix production, recipe data up to 64 types and 4,096 devices in total, can be easily set on a PC. The created recipe data is saved on an SD / SDHC memory card, and the specified data can be written or read from a PLC.

## Saving alarm history data on an SD / SDHC memory card

The alarm history data stored in the **GT** built-in memory can be saved on an SD / SDHC memory card, making it possible to easily control problems on a PC.

• The LCD images on this page are composites.

## High Visibility and Excellent Operability

#### Three-color LED backlights allows for checking machine status at a glance (GT02M / GT02G, GT05M / GT05G, GT12M / GT12G)

The monochrome display\* has a three-color LED backlight. It allows operators to check the equipment status at a glance by changing the background color.

Example: green under normal conditions, orange during operation, and red in emergency situations.

\* Excluding GT03M-E, GT32M-E, GT32M and GT02L

(Normal)

#### GT12G

(In operation)

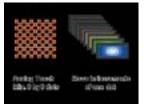

#### (Emergency)

#### Highly flexible screen design!

GT series displays use an analog-touch panel where locations of parts and characters can be adjusted in increments of one dot. The adoption of the Windows® font has widened the character size selection (10 to 240 dots), making the screen design more flexible. \*The maximum size varies depending on the model.

#### "Analog-touch design"

#### "TrueType fonts"

The adoption of the Windows® font has made it possible to choose a font focusing on the screen image and visual quality.

#### **Graph function**

One bar graph has a maximum of eight bars and can be combined with line graphs.

#### Flow display function

A flowing message of up to 64 characters (two-byte) can be displayed at the bottom of the screen. (128 messages)

#### Error warning by voice messages (GT32T1)

Voice messages or melodies immediately communicate the equipment status to operators not located near the equipment. The sound files are compatible with WAV format, which can be easily prepared by a PC.

Multi-function switches

Multiple operations are possible. For example, screens can be switched by setting multiple values.

### Portrait display ideal for narrow spaces

The unit can display screens in portrait orientation and can therefore be installed in narrow spaces, expanding system design possibilities and contributing to size reduction. The portrait display is also ideal for slim equipment without enough space to install a display.

#### 4,096-color parts libraries (GT05S, GT32T, GT03T-E and GT32T-E)

3D-design buttons with higher visibility and operability are available.

• The LCD images on this page are composites.

# Advanced Functions to **Enhance Work Efficiency**

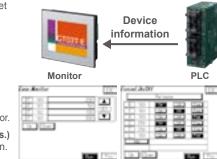

#### FP monitoring function (FP2SH, FP0R, FP-Σ, FP-X, FP-X0, FP-e, FP0 and FP2)

\*Excluding FP7

#### Five convenient features of GT series for improved compatibility with our FP series of PLCs

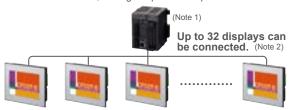

- 1 Device monitor (Display and change values of FP series devices. Three different modes available)
  - (1) Easy monitor mode: Use this mode when you want to monitor something. Display is continuous when one device is specified and the device can be changed.
  - (2) Entry monitor mode: Use this mode when you want to monitor multiple devices. You can register devices you want to display one-by-one and you can change them.
  - (3) Forced on / off mode: Use this mode feature to forcibly turn output on and off. You can set devices one-by-one for which you want to control output.
- 2 System register monitor (Display and change of system register values.) You can specify the system register number, display the value, and change it.
- Shared memory monitor (Display shared memory values.) You can specify the slot number, bank number and address, and display the value. You cannot change the value.
- Error monitor (Display an error occurring in the FP series PLC.) You can display the self-diagnostic result, error code and error flag, and you can even clear the error.
- Password setting (Set the password to protect FP series program reading and writing functions.) Password registration and clearing is possible for the **FP** series password protection function.

#### Multiple GT displays can be connected to our FP series PLC.

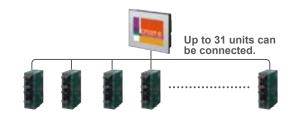

#### **GT** link function

Up to 32 GT displays can be connected to one PLC unit without communication programs. The same screen operation is possible at a conveyor line or other remote locations, and the number of PLC units can be reduced, cutting the production process costs.

#### Connectivity with multiple PLCs

Up to 31 PLC units can be connected to one **GT** unit. Progress in multiple production lines can be centrally monitored and controlled via one GT unit

Notes: 1) Our FP series PLC

2) As the number of connected units increases, the response slows down. Check the speed in the actual line

#### **Enhanced security with password protection**

Password protection and operation security functions protect the data asset in the display unit and control the authorization for operation.

#### **Password protection function**

The screen data upload operation can be restricted by using passwords to protect the data asset in the display unit.

#### **Operation security function**

Up to 64 operators can set individual passwords, and up to 16 levels of restrictions can be set on displays and operations for each part. The registered users and passwords can be changed on the display unit.

#### High-efficiency operation with through function

This function allows operators to simultaneously carry out the transfer of screen data of a GT series display and the debugging of our FP series PLC connected to the display.

GT32T1 supports Ethernet connection, which allows the through function to be controlled from a remote location.

#### Easy-to-switch language

Conventionally, screens were created for each language. With this new language switching function, data can be registered in multiple languages (up to 16) for each part. The characters can be easily edited with Microsoft Excel® and then imported.

#### Write device function

This function modifies the PLC data or turns bits on / off according to the PLC status or the screen No. Now four arithmetic operations between devices are also possible.

### Entry-level Model Touch Panel

3.7 inch (€ ເພັ່ນs Entry-level model

#### Compact body with a wide LCD that is the largest size in its class

The small body of 74 mm 2.913 in high and 112 mm 4.409 in wide is equipped with a 3.7 inch large LCD. The analog touch system does not display any annoying visible dots or lines.

#### MiniUSB interface as standard equipment

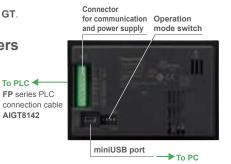

Supports the through function using a USB cable, allowing simultaneous debugging of PLC and GT.

#### Flexible sizing and layout available for switches and characters

Switches of a minimum of 8 × 8 dots can be moved in increments of one dot. A wide range of character fonts and sizes (10 to 64 dots) are supported.

#### Portrait orientation ideal for narrow spaces

Installation in narrow spaces is possible, enhancing the degree of system design freedom.

• The panel face protection sheet for the GT series is available as an option.

• The LCD images on this page are composites.

# GTWIN Ver.2

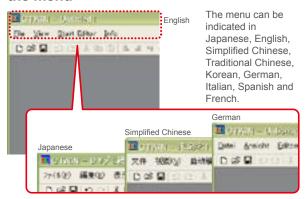

Screen Creation Tool for the GT series

User-friendly interface makes screen creation easier.

### Compatible with Windows®7

(Also supports 64-bit version.)

### Compatible with the nine languages for the menu

#### Simply drag-and-drop parts.

You can easily create screens by just dragging parts from the library and dropping them anywhere you want.

#### More user-friendly parts libraries

In the previous version, the required parts library had to be selected from the menu every time it was needed. The new version displays a list of parts libraries, making them more user-friendly. You can also freely set the parts library window size

### Just drag-and-drop your original parts to be registered.

You can also register your preset original parts easily by drag-and- drop operations.

#### 4,096 colors 3D design buttons

(for GT05S, GT32T, GT03T-E and GT32T-E)

3D design buttons with higher visibility and operability are available.

#### Screen copy in bitmap form

You can output screen images in bitmap form and use them in off-the-shelf applications. This is useful for preparing equipment operation manuals

Function to turn on / off the display of keyboard parts on the base screen

Indications of data parts in Japanese, Simplified chinese, Traditional chinese, and Korean

Now supports installation in a portrait orientation of all GT series models.

- \* The 64-bit version is not supported except for Windows® 7.
- $\bullet$  GTWIN Ver. 2.8 or later is not compatible with Windows  $^{\rm g}$  95, 98, Me or NT.

Refer to the "Technical Support Page" of our website for details, including the latest version of **Terminal GTWIN**, usable devices and addresses.

Please see manual for details.

2: Communication may not be possible when using RS485 depending on the sending and receiving timing with the other device.

3: We cannot specify what other device you should use; therefore, please test it using the actual equipment before using.

4: Available for models equipped with on RS232C port.

5: Direct connection is possible to the CPU unit of the PLC.

Connection is possible using the communications unit or a signal conversion cable, etc. (Example: The QJ71C24N or QJ71C24N-R2 calculator link unit is required when using the Mitsubishi Q Series.)

3: Connection is not possible Blank: Not evaluated.

| 24 V DC and RS422 / RS485           | Part No.: AIGT8175, PLC connection cable (5 m 16.4 ft), 8-pin mini DIN connector — 4 single wires + shielding wire   | Mitsubishi Electric FX series                              |
| 24 V DC and RS232C                  | Part No.: AIP81842, PLC connection cable (2 m 6.562 ft), 9-pin D-SUB connector — 6 single wires  | FP2 / FP2SH COM port, CCU (Computer<br>Communication Unit) |

<sup>\*1:</sup> The **FP7** series PLC can be connected using commercially available single wire cables.

## GTseries | PART NUMBER LIST

#### **Options**

■ Panel face protection sheets

10 sheets in a set (option)

| For GT02L / GT02 | Part No.: AIG02800 |
|------------------|--------------------|
| For GT05         | Part No.: AIG05800 |
| For GT12         | Part No.: AIG12800 |
| For GT32         | Part No.: AIG32800 |

**■**Waterproof packing Waterproof packing (for replacement), 10 pieces in a set Package includes one piece.

| For GT02L / GT02 | Part No.: AIG02810  |
|------------------|---------------------|
| For GT03-E       | Part No.: AIG03810E |
| For GT05         | Part No.: AIG05810  |
| For GT12         | Part No.: AIG12810  |
| For GT32         | Part No.: AIG32810  |
| For GT32-E       | Part No.: AIG32810E |

\* The waterproof packing for GT02(L) is different from the GT02L main unit

5 sets of mounting parts (4 parts / set)
Package includes one set.

Part No.: AIG12830

## ■ GT02 / GT02L / GT03-E / GT12 mounting parts 5 sets of mounting parts 5 sets of mounting parts

(2 parts / set)
Package includes one set.

Part No.: AIGT28321 For GT05

Part No.: **AIG32830** For **GT32 / GT32-E** 

#### ■ Spare connector

5 connectors for communication and power supply in a set Package includes one set.

Part No.: AIGT084

■GT02 / GT03-E / GT05 / GT12 / GT32 /GT32-E backup battery

Part No.: AFPX-BATT

#### Conformance to the UL / cUL standards

| UL / cUL file No. | E96300 |
|-------------------|--------|
| UL standard No.   | UL508  |

Notes: 1) Please use within a temperature range of - 20 to + 55 °C - 4 to + 131 °F when horizontally installed and vertically installed in a portrait orientation and when using battery.
2) This protective structure condition applies to the front surface of the installed panel. This condition does not guarantee usage in all environments provided by users. When reattaching the panel, replace the waterproof packing.
3) The number of screens that can be registered varies according to the registered contents.
4) The data logging and SD recipe functions are available with only models equipped with an SD / SDHC memory card slot.
5) The 64-bit version is not supported except for Windows® 7.
6) Simultaneous USB and Ethernet communications are not possible.

#### Conformance to the UL / cUL standards

| UL / cUL file No. | E96300 |
|-------------------|--------|
| UL standard No.   | UL508  |

- Notes: 1) This protective structure condition applies to the front surface of the installed panel. This condition does not guarantee usage in all environments provided by users. When reattaching the panel, replace the waterproof packing.

  2) The number of screens that can be registered varies according to the registered contents.

  3) The data logging and SD recipe functions are available with only models equipped with an SD / SDHC memory card slot.

  4) Simultaneous USB and Ethernet communications are not possible.

  5) Among GT02 series, available for GT02M2 and GT02G2 only.

  6) The 64-bit version is not supported except for Windows® 7.

#### Conformance to the UL / cUL standards

| UL / cUL file No. | E96300 |
|-------------------|--------|
| UL standard No.   | UL508  |

Ramco Innovations

- Notes: 1) This protective structure condition applies to the front surface of the installed panel. This condition does not guarantee usage in all environments provided by users. When reattaching the panel, replace the waterproof
  - packing.

    2) The number of screens that can be registered varies
  - according to the registered contents.

    3) The data logging and SD recipe functions are available with only models equipped with an SD / SDHC memory card slot.
  - Simultaneous USB and Ethernet communications are not possible.

Got Questions?: Phone 800-280-6933

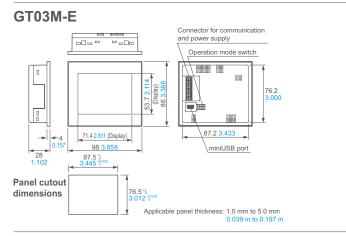

- 5) Please use within a temperature range of 0 to +40  $^{\circ}$ C +32 to +104 $^{\circ}$ F when horizontally installed and vertically installed in a
- thickness of the state of
- 7) The unit caries out serial communication data processing at 115.2 kbits / s.
- Nommunications with external equipment (PLC) are not available.

  9) The 64-bit version is not supported except for Windows® 7.

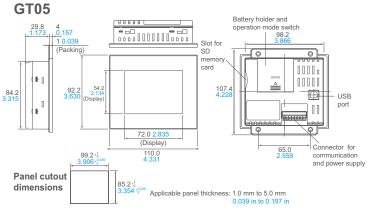

The CAD data in the dimensions can be downloaded from our website.
