Panasonic® INSTRUCTION MANUAL

DC Three-wire Type Cylindrical Inductive Proximity Sensor (small-sized type) **GX-300 Series**

MJE-GX3S No.0069-13V

Thank you very much for purchasing Panasonic products. Please read this Instruction Manual carefully and thoroughly for the correct and optimum use of this product. Kindly keep this manual in a convenient place for

⚠ WARNING

- Never use this product as a sensing device for per-
- In case of using sensing devices for personnel protection, use products which meet laws and standards, such as OSHA, ANSI or IEC etc., for person nel protection applicable in each region or country.
- Risk of explosion.Do not connect sensor to AC pow

1 COMPLIANT STANDARDS / REGULATIONS

This product complies with the following standards

<EU Directives> **EMC Directives**

2 PRECAUTIONS

- This product has been developed / produced for industrial use only.
- · Do not install the product in the following locations.Doing so may result in product failure or malfunction Outdoor locations directly subject to sunlight, rain, snow, water droplets, or oil.
 - Locations subject to atmospheres with chemical vapors, in particular solvents and acids
- Locations subject to corrosive gases.
- The Sensor may malfunction if used near ultrasonic cleaning equipment, high-frequency equipment, transceivers, cellular phones, inverters, or other devices that generate a high-frequency electric field.
- Laying the Proximity Sensor wiring in the same conduit or duct as high-voltage wires or power lines may result in incorrect operation and damage due to induction. Wire the Sensor using a separate conduit or independent conduit. • The following conditions shall be observed if you use
- the product under an environment using cutting oil that may affect product's life and/or performance.
- Usage in oil or water is prohibited.
 Impact on the product life may differ depending on the oil you use. Before using the cutting oil, make sure that it should not cause deterioration or degradation of sealing components.

 Never use thinner or other solvents. Otherwise, the
- Sensor surface may be dissolved.
- When turning on the power by influence of temperature environment, an output mis-pulse sometimes occurs. After the sensor has passed for 300 msec after turning on please use in the stable state
- The sensor is adjusted with a high degree of accuracy, so do not use in the environment with sudden
- temperature change.

 Do not attempt to disassemble, repair, or modify the product. • Do not use a voltage that exceeds the rated operating
- voltage range. Applying a voltage that is higher than the operating voltage range may result in damage or burnout. • Be sure that the power supply polarity and other wiring is
- correct. Incorrect wiring may cause explosion or burnout.

 If the power supply is connected directly without a load, the internal elements may explode or burn. Be sure to insert a load when connecting the power supply.

3 MOUNTING

Tightening Force

• Do not tighten the sensor mounting nuts with excessive force. Secure the mounting nuts to the corresponding torque values in the following table.

INFLUENCE OF SURROUNDING METAL Must Use the Accessory Nut When Using GX-305M.

			, —	
				(Unit:mm)
	GX-303S	GX-304S	GX-305S	GX-305M
Q	0	0	0	0
m	3	5	3	5
φd	3	4	5.4	5
D	0	0	0	0

MUTUAL INFLUENCE

 When the Proximity Sensor is embedded in metal, ensure that the minimum distances given in the following table are maintained.

DIMENSIONS OF FIXING HOLE

Model No.	F
GX-303S	φ3.3 ^{+0.5} ₀
GX-304S	φ4.2 ^{+0.5} ₀
GX-305S	φ 5.7 ^{+0.5} ₀
GX-305M	φ 5.5 ^{+0.5} ₀

PNP output type

5 HOW TO DETERMINE THE SETTING DISTANCE

- Please use it after confirming the installation distance by following (a) and (b) with an actual detection object when you install (a)The detection distance receives the influence by the material of the detection object, thickness, shape, and the size. So, the detection object is brought close forward of the sensor and detection distance (S) is measured. (b)Please decide installation distance (Sa) with S×70% or less after measuring sensing distance(S).

 • Please install the sensor to come within the range of (Sa)
- when the detection object moves from vertical direction
- Please install the sensor to pass within the range of (Sa) when the detection object moves from horizontal direction.
- Please check the specifications and the graph of detection object size influence for your reference
